HVAC
The core of Honeywell Buildings offering is the WEBs-AX automation controllers. Built on the Niagara^AX framework, WEBs-AX controllers provide an open communication solution for web-enabled buildings.

Security
WEBs-AX Security can work as a standalone system or integrate easily with other WEBs-AX products as well as third-party devices for information-sharing on the enterprise level.

Video
WEBs-AX Integrated Video Drivers provide an open video framework designed to integrate with diverse manufacturer IP and analog devices and protocols.

Energy
An enterprise energy monitoring application designed to help manage energy in one or more facilities. WEBs-AX Energy Analytics is a software solution that provides real-time connectivity to metering technologies and other third-party systems and devices using a Web browser.

Third Party Integration
The WEBs-AX open systems allows for integration to third party devices via BACnet®, LonWorks®, Modbus®, and oBIX.
